Education

Jadavpur University

Bachelor of Technology in Production Engineering

Dec. 2020 – May 2024

Kolkata

Relevant Coursework

- Data Structures
- Algorithms Analysis
- Database Management
- Artificial Intelligence
- OOps

Experience

Adqura

Software Engineer

Aug 2024 – Present

Hyderabad

- Developed a service to automatically perform a set of unit tests daily on a product in development to decrease the time needed for team members to identify and fix bugs/issues.
- Developed and deployed decision strategies in Pega CDH for data processing, utilized real-time data, and processed it using SQL in DBeaver.
- Utilized Agile Methodology to provide a continuous integration service to analyze and make marketing decisions while working for Vodafone UK UI user Stories.
- Explored methods to visualize and simulate various marketing scenarios to enhance the effectiveness of our marketing application.

Apna College

Front End Developer Intern

May 2024 – August 2024

Remote

- Assisted in development of the front end of a mobile application for iOS/Android using Dart and the Flutter framework.
- Worked with Google Firebase to manage user-inputted data across multiple platforms, including web and mobile apps.
- Collaborated with team members using version control systems such as Git to organize modifications and assign tasks.
- Utilized Android Studio as a development environment to visualize the application in both iOS and Android.

Projects

Law Buddy - Voice-Enabled Legal Assistant | Python

January 2024

- Developed a RAG-based chatbot using LLMs, LangChain, and ChromaDB for legal query answering.
- Improved response accuracy by fine-tuning the RAG model with domain-specific legal data, ensuring more relevant and precise answers to user queries.
- Integrated voice interaction and developed an analytics dashboard in Streamlit.
- Created categories for document upload and case categorization features.

Sort Algorithm Visualizer | C++, VS Code

November 2023

- Created an application using C++ and VS Code to visualize various sort algorithms.
- Utilized SDL2 Library and STL that comes with C++ for visualization and UI development.
- Implemented object-oriented programming practices such as Encapsulation for logic implementation.

Technical Skills

Languages: C++, C, SQL, Python

Developer Tools: VS Code, Android Studio, DBeaver

Technologies/Frameworks: Windows, GitHub, PostMan

Achievements

- Achieved 1958 rating (4 star) in CodeChef with global rank 15 in SnackDown 2021 Elimination Parallel round.
- Achieved 1410 rating(Specialist) in Codeforces, one of the Largest Competitive Coding platforms.
- Achieved 424 rating(Brown) in Atcoder, one of the Largest Competitive Coding Platforms.
- Achieved 1961 rating(Top 3.33 percent globally) in Leetcode Achieved the Knight Badge.
- Managed to be a Finalist in Airbus Aerothon 5.0 Hackathon by Airbus India.
- IICC(Organised by AICTE) finalist with AIR 241 (total 1 Lakh participation).
- Achieved Global Rank of 166 in Codegoda- Contest organised by Agoda company.
